

CIS 623 Exercises 2: Comprehensions & Recursions

Complete this by class time Monday January 29

Reading

Read the first five chapters of *Learn You a Haskell for Great Good*.

Optional Reading

For a different take on recursion in Haskell see Chapter 4 of *Real World Haskell*:

<http://book.realworldhaskell.org/read/functional-programming.html>

See especially the “How to think about loops” section: <http://book.realworldhaskell.org/read/functional-programming.html#fp.loop>

Problems

Do at least the first 12 problems under `edinburghTutorial1` on

<http://camlback.cs.ucla.edu/>

Doing more problems would be better, but the first twelve should suffice.
